

Draft issues recorded at the 12/4/97 Hydro Meeting:

NOT to define new standard, but support other standards.

ID standards AND “do” the work.

Agree to minimum standard to exchange.

Agree to hold data in the same standard.

Define responsible party per huc.

id steps, break into sub groups {attribute, lat/long id}

ID policy.

Get FS participation

Define custodian of data.

Determine solution for “huc-in” “huc-out”

follow thru IRICC effort to “draw the lines” (prioritize/get Watershed councils to help)

- get out to each region “draw” the lines, get more follow-up, get watersheds to help.

coordinate with councils for delineation densification.

redefine the watershed boundary, what already created and aggregate to theirs (BLM?)

ODF is interested in doing work in watersheds that BLM has not done yet.

TJV to get training materials to ODF to work with same protocol.

Need to get consistent interpretation on the “approach”.

Agree on protocol.

workshop for FS, BLM to come to “grips” with the lines, which one works which one doesn’t.

Policy : bob Theresa, deb

Data Design: Emmor, Bob

Define goals

Define audience

Define Standard

Define Data Collection

Define Decision rules

Define core attributes (data design)
