## 1. Web-base geospatial projects – Erik

- Review in September
- Want secure and only for GPL, Erik looking at putting on GovSpace.
- Review in Sept GPL meeting
- Erik will send out email for folks to review before September's meeting

## 2. Roads Web Portals – Erik

- Erik sent out an email June 29<sup>th</sup> on this
- Need to create a profile to get the data (this could take a few days)
- State agency only data is downloadable
  
- Web folks (those who do development work for web applications are not at GPL meetings, when we talk about web services and make decisions.
- We need to be let web developers know about web topics the GPL will be discussing.
- How to develop standard for web – rest services – for FIT

## 3. Community Map

- Cartographic standard
- For web maps
- FIT standard?
- Standard for web display – develop one, web development group or ??

## 4. Oregon Explorer Map View

- Will ask Mark to demo in September
- GEO will look check to see if OR explorer is using OR data or ??

## 5. Discussion about changing the URL's for GEO - Emmor

The new bureaucratic organization requires a change. We should advocate a functional website organization for GEO rather than organizational.

Take recommendation to OGIC

[gis.oregon.gov](http://gis.oregon.gov) is imbedded in documents

Idaho has been able to keep this around when they did a big organization change.

5. Geocode – Erik shared there is a new geocode available. Erik will send out the link and info after meeting.
