

GPL Meeting Notes for November 13 2012

Present: Gail Ewart, DLCD; Rachel Smith, DOGAMI; John Prychun, DOR; Dan Antonson, DSL; Erik Endrulat, GEO; Milt Hill, GEO; Emmor Nile, ODF; Chad Brady, ODOT; Ashley Seim, OWEB; Bob Harmon, OWRD, Diana Walker, ODA

On Phone: Don Pettit, DEQ; Malavika Bishop, DEQ; Randy Dana, DLCD/OCMP; Randy Soundhein, DSL; Ken Hill, ODM; Marc Rempel

Location: Oregon Department of Forestry, Salem Oregon

Host: Emmor Nile

Announcements:

GIS Day Nov. 14, 2013

OGIC December 19th

Meeting for the next 3 meetings

December 11th - All call in meeting

January 8, 2013 – DOGAMI

February 12, 2013 – GEO topic Broadband (??)

1. GEO's update on their reorg. They have moved to the Oregon Executive Building on Cottage Street. Office located on the 4th floor. All is staying the same except of the physical address.

2. ArcGIS online:

Need more information/meeting on guidance. There were lots of questions, comments, and issues to address. So, December's GPL meeting will be on ArcGIS Online starting to deal with the technical issues.

We need to identify:

Best practices,

Governance – who does what

Identifying map services that are being hosted by other agencies

3. GIS Project Inventory – This was done to respond to a request from OGIC that we, GPL, would share what projects we are doing so there is not the 'recreating the wheel' at different agencies. The one problem with this is getting folks to fill out the form. Need to ask OGIC if they want us to keep working on/pushing on this, since we do here at the monthly meetings. FIT meetings are also a place of sharing what is going on.

Milt will check to see if this type of tracking is also happening in the IS realm.

4. Spatial Data Explorer Presentation by Marc Rempel

Marc presented a demo of the capabilities of the new Spatial Data Explorer

<http://spatialdata.oregon.explorer.info>

Check out the new search options

5. There is a need to set up a State ESRI User-group meeting in January for John Sharrard's presentation on Relevance.
