Framework Standard: Census Data

Ethan Sharygin sharygin@pdx.edu Portland State University

OREGON FRAMEWORK FORUM / FALL 2023 / SALEM, OR

2

Objectives

1.1 Incorporate census geographic boundaries from the latest 2020 and previous years that are relevant for Oregon state's geospatial data goals and agency planning purposes.

1.2 Collect, standardize, and filter demographic data available at each geographic level in the Framework to ensure that Framework data users are relying on a common set of recognized and reliable indicators for all state planning purposes.

1.3 Develop a dashboard that leverages these Framework data elements to demonstrate the relationship of demographic data to other summary indicator projects.

<u>Elements</u> census geography (ID:9)

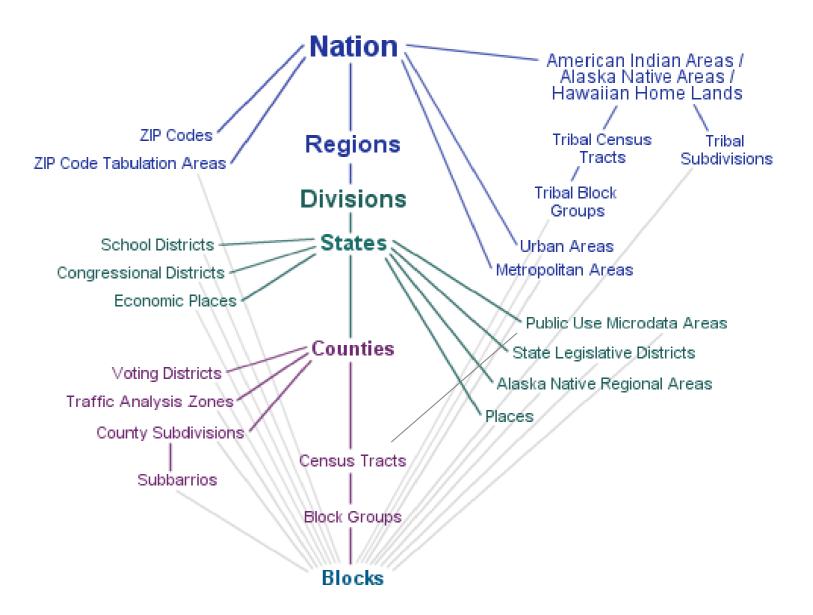

demographic data (ID: 85)

1.1 Census geographic boundaries

Example data hierarchies for OR:

A: blocks within block groups within tracts within counties (or PUMAs) B: blocks within places* (incorporated, defunct, or censusdesignated) within Oregon C: blocks within county subdivisions within counties. D: blocks within ZCTAs* E blocks within tribal areas* *: may be identifiable by county

*: may be identifiable by county

1.1 Census geographic boundaries

A. Proposed census geographies for framework:

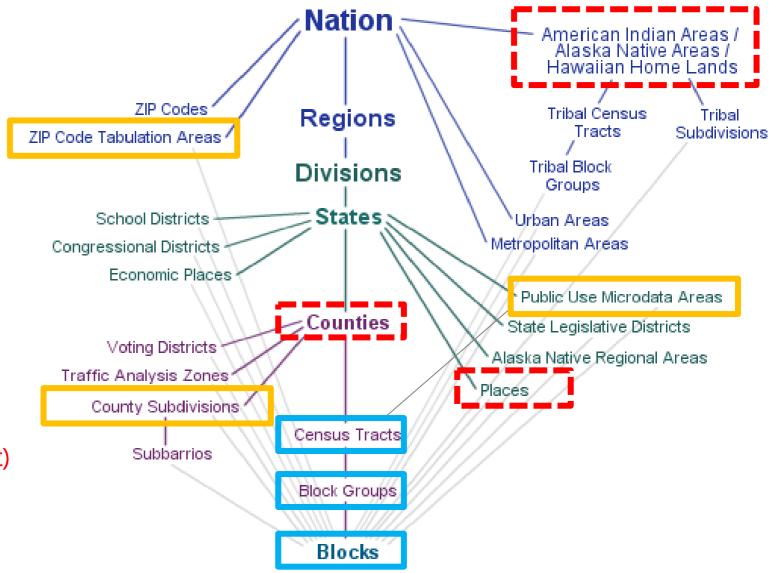

* Blocks (N=130,807)

* Block groups (2,970) * Tracts (1,001)

* Tracts (1,001)

B. Possible future geographies:
* Public Use Microdata Areas (35)
* County subdivisions (212)
* ZCTAs (429)

C. In conflict with other standards:*
* Places (426 total; 240 cities; 1 defunct)
* Urban Growth Areas (219)
* Counties (36)
* Tribal Areas (11)

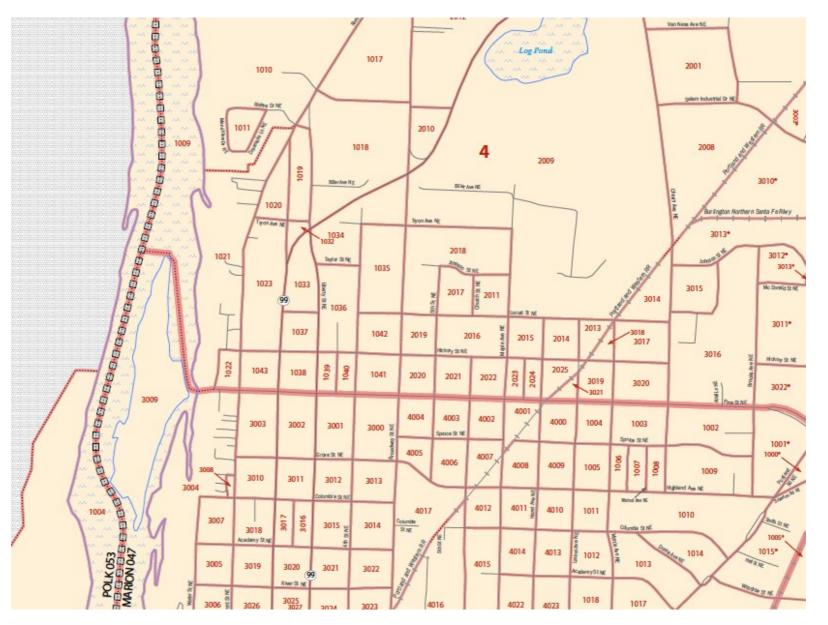

1.1 Census geographic boundaries: blocks

BLOCKS:

Small areas bounded by physical,political, right-of-way, or line-of-sight.4-digit code unique within tract.Significant changes each decade.

<u>Files:</u>

tl[VVV]_41_tabblock[YY].gdb tl[VVV]_41_tabblock[YY].fgdc.xml Format: file gdb + separate xml Datum: GCS NAD83 Spatial accuracy: varies Positional accuracy: up to 6 decimal places (typically lower). Entity codes: ANSI (FIPS or GNIS)

1.2 Data: blocks

Data elements (table within gdb):

- Geographic ID (FIPS),
- Physical geography (area, internal point);
- Resident population (by age/sex or race/ethnicity or housing/group quarters);
- Households (by type);
- Housing units (by tenure/occupancy).2010: 60 fields; 2020: 58 fields.

10-character field names (with aliases) Decadal updates (DEC only)* <u>Files:</u>

1.1 Census geographic boundaries: block groups

BLOCK GROUPS:

Smallest statistical areas with rich socioeconomic data published from ACS, but low reliability. Population of 600-3,000. 1-digit ID within tract (first digit of block). Redrawn each decade with local participation.*

File naming: tl[VVVV]_41_BG[YY].gdb tl[VVVV]_41_BG[YY]. fgdc.xml

²⁰²⁰ block groups in western Marion County (North Salem)

1.2 Data: block groups

Data elements (table within gdb):

- Same as BLOCKS*, but also:
- Additional population/housing;
- Commute;
- Children;
- Education;
- Language;
- Income;
- Industry/Occupation.2010: 284 fields; 2020: 291 fields

Includes 90% MOE (num) + REL (text) Decadal/5-year updates (DEC/ACS)* <u>Files:</u>

1.2 Interlude: reliability

ACS replaced long form of the decennial census in 2010. Rolling response, smaller sample size, lower response rate all translate to less reliability: "warm [but] fuzzy" (Macdonald 2006).

"many [planners] do not understand the statistical uncertainty in ACS data, find it difficult to communicate statistical uncertainty to stakeholders, and avoid reporting MOEs altogether." (Jurjevich et al. 2018).

To Increase Actionability of Uncertainty Information					
Include 90% MOE with data, and		High reliability (CV<20%)			
easily interpreted reliability indicators		Medium reliability (CV between20-40% - be careful)			
based on relative standard error.*		Low reliability (CV>40% - extreme caution).			

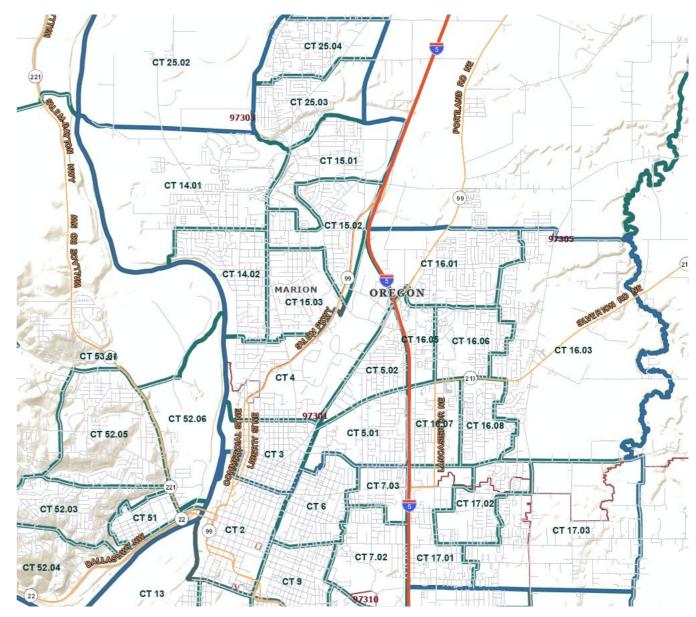

Spielman SE,Folch D, Nagle N. Patterns and causes of uncertainty in the American Community Survey. AppGeogr. 2014;46:147157. doi:10.1016/j.apgeog.2013.11.002 Jason R.Jurjevich, Amy L. Griffin, Seth E. Spielman, David Œolch, Meg Merrick & Nicholas N. Nagle (2018) Navigating Statistical Uncertainty: How Urban and Regional Planners Understand and Work With American Community Survey (ACS) Data for Guiding Policy, Journal of the American Planning Associatio,84:2, 112126, DOI: 10.1080/01944363.2018.1440182

1.1 Census geographic boundaries

TRACTS:

Relatively small, stable statistical subdivisions of a county. Extensive socioeconomic data published from ACS, improved reliability. Population size of 1,200 to 8,000 people (average 4,000). 6-digit codes unique within county. Reviewed each decade with local input.*

File naming: tl[VVVV]_41_TRACT[YY].gdb tl[VVVV]_41_TRACT[YY].fgdc.xml

1.2 Data: tracts

TRACTS (data table w/in gdb): Data elements:

- Same as BG*, but also:
- Additional population/housing;
- Health insurance;
- Census response rate;
- Labor force;
- Disability;
- Migration.2010: 388 fields; 2020: 409 fields

Includes 90% MOE (num) + REL (text) Decadal/5-year updates (DEC/ACS).* <u>Files:</u>

1.1Census geographic boundaries (candidates)

PUMAS:

Geographic areas containing at least 100,000 people. Maximum socioeconomic detail from ACS. Comprised of tracts. Redrawn each decade with state participation.* Released 2 years after last census.

File naming: tl[VVVV]_41_PUMA[YY].gdb tl[VVVV]_41_PUMA[YY].fgdc.xml

Metadata: same as BLOCK PUMA entity codes (no ANSI standard)

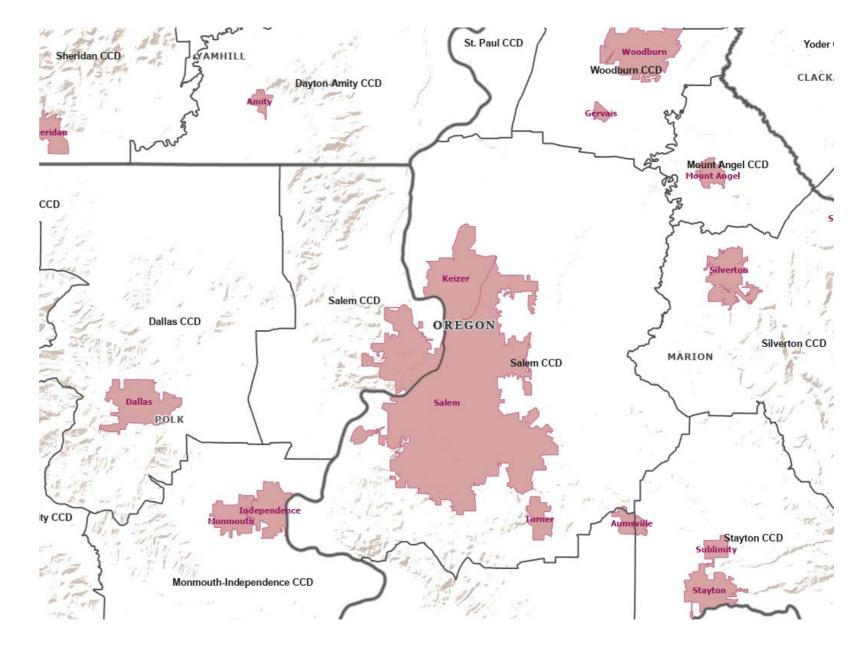

2020 PUMA in western Marion County (North Salem)

1.1Census geographic boundaries (candidates)

CENSUS COUNTY DIVISIONS: Stable statistical areas used since 1960 in states without functional sub-county civil divisions. Limited socioeconomic detail from ACS. 5digit (FIPS) or 8-character (GNIS) code within county.

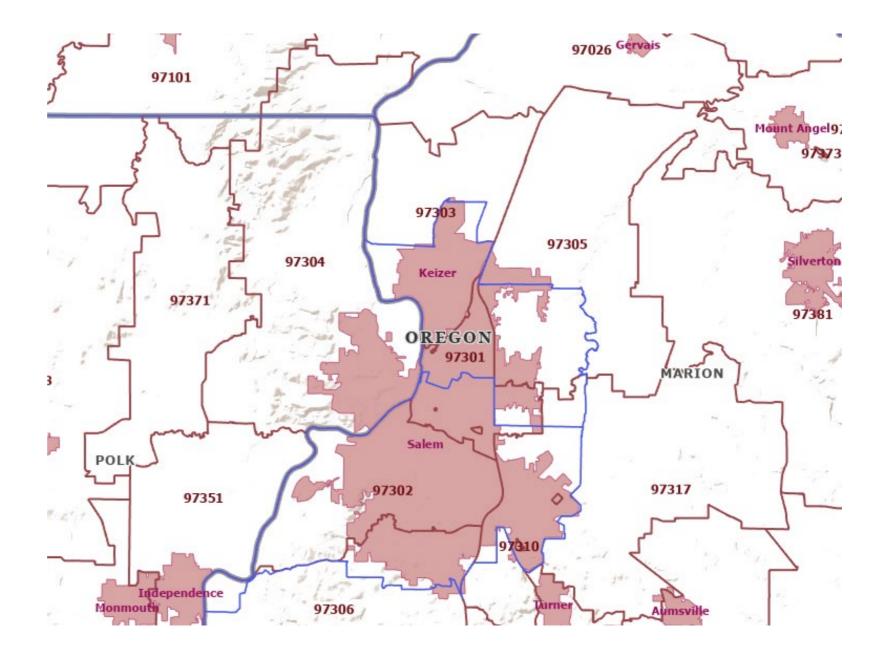

File naming: tl[VVVV]_41_CCD[YY].gdb tl[VVVV]_41_CCD[YY].fgdc.xml

1.1 Census geographic boundaries (candidates)

ZIP CODE TABULATION AREAS: Approximation of USPS ZIP codes made from census blocks. Limited socioeconomic detail from ACS. Incomplete coverage of unpopulated areas. 5-digit code within nation.* Released 1 years after last Census.

File naming: tl[VVVV]_41_ZCTA[YY].gdb tl[VVVV]_41_ZCTA[YY].fgdc.xml
