

# Notes

## Administrative Boundaries FIT Planning Workgroup

**Meeting Date:** March 4, 2014  
**Time:** 10am-noon  
**Location:** ODOT at Mill Creek, Salem

Attendees: Robert Mansolillo, DLCD  
Bill Clingman, LCOG\*  
Ryan McKinnis, ODOT  
Bob DenOuden, DAS/GEO

Gail Ewart, DLCD  
Alex Bettinardi, ODOT  
Chad Crockett, ODOT/FIT Chair

\*via phone

Gail convened Meeting 9 of the Planning Workgroup, and we introduced ourselves. There were no additions or changes suggested to the draft agenda, so we will use the draft agenda as is.

### Using Zoning for modeling transportation growth

Alex and Ryan shared a preliminary comparison of the new zoning Framework to the old data used previously in SWIM. In order to do that, they translated the statewide classes to match with the old classes used in the model previously. They compared areas and zoning changes. The first map showed some continuity but also evidence of more complete mapping in the new zoning data set. The change of zones map was substantially different and more refined using the new zoning Framework, even though it isn't complete across the state.

ODOT will proceed with the actual modeling and share the results with us at the next meeting which would be in about six weeks. Ryan can use that as the initial input for the model. Gail has initiated the second wave of outreach with regional reps. Robert will continue to support that and add data when the crosswalks are completed. Thus far, no one has asked for data development funding or assistance. Dave Snader, GEO, is still available to help Grant Young with outreach to eastern Oregon communities. The new comment period is running for the revised zoning extension to standard.

**Action:** **Alex and Ryan** will report on modeling results using the new data at our next meeting. **Gail** will contact Dave Snader. **Robert** will provide Chad with zoning geodatabase for enterprise deployment at ODOT. **Bob D** will sync the link on the FIT page to the current version of the Zoning Extension to Standard. **Gail** will virtually introduce Robert to Dave S in Bend.

### Standards Forum

Gail briefly summarized the comments gathered on the zoning extension to standard after her presentation. Gail also gathered input on ways UGB changes could occur without triggering a land use action. Robert is incorporating the new information into the stewardship plan.

### Administrative Boundaries FIT meeting

Gail summarized the discussion about reviewing and updating the vast Framework. Each "layer" is referred to as an element. She told everyone that the Planning WG (us) has already made good progress on this effort.

### Updating and Refining Planning Framework

Gail did not have time to generate a summary table of changes based on last meeting's discussion. She will do that soon and post it to the list for comments. When we get a final version, we will provide it to Chad C, as Chair of the Admin Bnds FIT. At some point, Bob will update the Framework database.

Robert's research indicates we have most of the comp plan data. We need to forge a common designation table, which would be similar to the zoning effort. Suggest checking with Metro (Zac or Dennis) to see how Metro has handled comp plans. LCOG has an integrated comp plan map but is not the data owner. A reasonable goal is to boil them down to about 20 designations.

Action: **Gail** will post summary of changes for comment. **Gail** will contact Metro re comp plan integration. **Bill** will check on sharing integrated comp plan map data. **Robert** will do additional research on existing holdings.

The meeting was adjourned.
