

GPL Notes for May 13, 2014

Time: 1:30 PM to 3:00 PM

Location: All Call-in ILinc Meeting

A: = action item

Introductions:

Announcements:

- State User Group Meeting June 3rd, 8am – Noon, ODF, 2600 State St., Salem – Tillamook Rm.
- ESRI UC July 14-18, - San Diego, CA <http://www.esri.com/events/user-conference>
- FOSS4G Conference, Sept 8-13, Portland <https://2014.foss4g.org/cfp/>
- NWGIS Conference, Oct 13-17, Lynnwood, WA [NWGIS Conference](#)
- OR and WA URISA Chapters to hold a joint conference in 2015 in Vancouver, WA.

Rachel reviewed the upcoming meeting locations and mentioned items that have changed recently or may change in the line-up of meeting locations.

Review of March Meeting Action Items:

Rachel reviewed all of the action items in the April meeting minutes.

Emmor – reported on the workgroup created to revise the Map Element Standard into a Cartographic Best Practices document. The document is 99% ready to go for GPL review, but it needs final formatting.

Emmor will be sending the final draft document out to the group for review ASAP.

Brady C. checked in with the EPSG and they are not going to be looking at the GPL specific issues until their next meeting in June - with resolution by late June. (GPL issues: requested distance of OGIC from the metric version of the OR standard coordinate system, and to have EPSG add the CORS96 datum as a registry option.) Bob D. has edited/removed the DAS GEO web site references to the metric unit as specified as an April action item.

FIT Update/Announcements: Bob Denouden

The soils FIT has a new leader and is working on a new soils data layer for Oregon (new statewide standard).

The metadata workgroup met a couple weeks ago to better define the Oregon metadata standard. No changes in the standard; only clarifying the mandatory items for the standard.

The Shoreline Accessibility workgroup recently met on the 20th. The E-FIT data acquisition advisory committee also met to work on a statewide prioritization plan for lidar acquisition as required for the 3-DEP program.

The planning workgroup within the Admin. Boundaries FIT met today.

There is a new proposal to adopt the NENA address standard. Michael Gurley at OEM will be leading the effort to work this standard through the FIT process.

Coming down the road is an amendment to the Flood Hazard data standard, led by Jed Roberts, DOGAMI. This is in review by the Hazards FIT now.

The water and monitoring well standard amendment and the zoning extension to the admin. Boundaries amendment is moving forward to OGIC next month for approval.

There was an elevation FIT panel discussion at the GIS in Action conference in April.

There is a UGB stewardship plan draft posted and out for review/comment.

Agency Round-Table:

Don Pettit – DEQ has a new project starting. They are meeting w/ the northwest area committee (oil spill centric group) to discuss how to break up the OR & WA shoreline into response areas for clean-up. It will be broken into segment lengths based on geomorphology, access, and surveyable units. They will be using the new shore zone product (OR shoreline w/ type data) that ODFW just completed.

Prep-FIT will meet again in mid-late June.

The Coastal FIT group is meeting May 28th.

SLIDO vs. 3 was released by DOGAMI. This data is available on DOGAMI's web site as a data download, map viewer and web services.

FEMA region X has requested data on potential contaminant sources. DEQ is looking at how to create a similar, but newer data set with new source data.

Rachel mentioned the Adobe CS license change to the group. Adobe products are moving to a subscription service vs. purchasing a specific version of a license w/ CD. Users will have to pay a monthly fee to access the software. If you do not maintain your subscription, you will lose access to your files unless you purchase stand-alone licenses prior to June 1st.

Elevation FIT question – the USACE will be doing some lidar flights and RandyD. didn't know if the group knew about it. He was interested in GPL providing input to where they will collect data. Rachel commented that it would be good to have a USACE contact so that we can contribute.

Malavika B. – She has a couple of users interested in the ArcGIS Business Analyst which is not part of the ELA. It is an AGOL add-on. The software/license is sold at its most minimal level = 5 user access. This would allow for 5 users to access the add-on for 1 year. She would like to know if anyone else is interested in sharing the cost by essentially purchasing users to participate. The cost is \$500 each. The AGOL version is a subset of the desktop license. You cannot download spatial data to the computer, but you can make maps, generate reports, etc... They are hoping to make a decision on the purchase in the next 2 weeks. You can also evaluate the software online for free as a trial. Here is some info from Lee (esri).

Esri Business Analyst Online (BAO) is a Web-based solution that makes custom site evaluation and market analysis fast and easy. Utilizing extensive demographic, consumer spending, and business data, BAO provides detailed information and insights about consumers, their lifestyles and buying behavior, and businesses in your market area.

With BAO, you can:

- Analyze trade areas, competition, supply and demand
- Evaluate sites
- Determine population within a specific drive-time or distance
- Identify and segment customers
- Reach your customers more effectively
- Explore markets in the US and Canada

Lidar Report – Rachel Smith

No update.

DAS GEO Announcements – Cy Smith

No update.

State User Group Meeting Discussion

The State User Group Workshop is scheduled for June 3rd @ ODF from 8am-Noon. This discussion was utilized to figure out final logistics needed and to share the details on the workshop. Here is a list of action items and pertinent notes:

- Bob D. will set up a doodle poll for registration to get people signed up.
- Rachel will make up a hand-out to send out to folks/list serves.
- Advertising: state esri user group list serve and gpl list serve
- First come first served, doodle poll w/ details of requirements.
- Lee will contact Dave Mather to prep him on AGOL user sign-up.
- Bob will check w/ Cy on possibly providing coffee and/or bagels for the meeting.
- Emmor will be setting up the room the afternoon of the 2nd for those who can stop by and help.
- Cap on 40 attendees maximum.
