

GPL Meeting Minutes – October 12, 2021

Attendees:

Tanya Haddad, DLCD
Joe Severson, OSMB
Brady Callahan, OPRD
Randall Sounhein, DSL
Daniel Stoelb, OEM
Paula Wills, OWEB
Malavika Bishop, DEQ
Rachel Smith, DAS/GEO
Bob Harmon, OWRD
Melanie Wadsworth, OSFM
Rudie Watzig, DGMI
Dorothy Mortenson, OWRD
Phil McClellan, DOR
Kathryn Helms, DAS/CDO
Eric Main, OHA
Arron Heriford, OHA
Jacob Cruser, ODA
Myrica McCune, INR
Tom Elder, DAS/GEO
David Mather, DAS/GEO
Terri Morganson, ESRI
Chris Marsh, ESRI
Phil Smith, ODOT

Announcements:

OGIC Oct 21st
NW GIS Conference Oct 26-27th

GEO/FIT Report

New staff at GEO (Data Unit in Data Governance and Transparency Office), Tom Elder (formerly DHS/OHA) and Willow Crum (formerly OPRD). Willow will work with Rachel on Framework Program items that need to be picked up and moved forward. Tom Elder will be helping Dave Mather working on SQL, AGOL admin, data QA/QC, publishing.

Rachel getting up to speed on ESRI ELA, GeoHub and data development projects planned for this biennium. Trying to get a plan together for that large body of work. Future GPL topic to share what the work looks like and how it ties to enterprise data sharing with public bodies. Also working on OGIC administration, changes to membership, and way council is administered using Workday now.

Cy working on IAA's for agencies that need amendments for ELA. Also, Framework grant IAA's going out now.

David Mather is working to onboard Tom and Willow, reshuffling, going through AGOL to free up some accounts. Agency Admins asked to help audit unused accounts. Maybe shift to Viewer or HUB

community accounts. Will send a user list to agency Admins. Will be briefing Rachel and Tom on the technical architecture of GeoHub as it has been conceived. Hopefully be able to get to some SQL architecture projects that have been put off.

CDO Report

New staff Tom, Willow, Jason Ruud (PM), a few more positions to come at the end of the month. Decided to pull the rotation posting for Josh's position and think more about what the role will be doing since they will be acting as an operational lead role for the GEO and likely the other added positions. Reminder of Open Data program, most agencies have coordinator positions at this point, a progress report is coming on their deployment. Coordinators have received inventory training and may start to reach out in their own agencies as time goes on. Developing a POP for 2023 to help with FIT staffing/resources.

HB2549 Public Access Site Reporting and Map

HB2549 requires reporting of new openings, closures, and reopening of public waterway access sites to the Marine Board. The bill was not sponsored by OSMB and they stayed neutral but do support it. Requires state agencies that have land used for recreation to do the reporting. Have met with the five public agencies (OPRD, ODF, DSL, ODOT, ODFW) about using Survey123 as the reporting mechanism. OSMB is required to provide a public map of the information. The Survey and Map are out for public comment period. Current reporting requirement is annual. Tanya commented that more dynamic data could be useful for public or other agencies.

OEM/Prep FIT HUB Site

Develop a location to engage their community and inform them of initiatives that they are working on in the realm of response and recovery. Includes the Emergency Preparedness Framework Data Catalog (EPFDC) in order to meet the after-action report request for data access. Have also included an area for improving coordination. The section includes the after-action report and plan along with emergency data contacts. Also include a link to join the FIT mailing list (listserv). Cascadia Rising 2022 has been postponed.

DEQ assisting Multnomah County and City of Portland in assessing what kind of toxic plume might be caused by a major Cascadia event. DEQ examining how to return fuel supply to the region after a large earthquake.

Question from Tanya about identifying current critical facility data sources. Most content appears to be older or not maintained. Coastal zone data from DOGAMI is older, from 2007. Daniel/Don said they would help track down the datasets if provided a list.

Using Dashboards and Survey123 for updating and authoring data at OSMB

OSMB using Dashboards and Survey123 for Program Coordinator staff to enter and view/maintain the data related to their program. Using a standard set of instructions and steps for users to create Dashboard and embed Survey123 so there is consistency on the public side. Sample of the Life Jacket Loaner Program which provides grants for constructing and stocking

the free loaner stations. Public side Dashboards for data viewing:

<https://www.oregon.gov/osmb/boater-info/Pages/Life-Jacket-Loaner-Stations.aspx>

OSMB mapping and geospatial content are accessible through <https://boatoregon-geo.hub.arcgis.com/>

Roundtable

DEQ – Working on Environmental Data Management System “Your DEQ Online” (YDO). The system has two components: data and GIS viewer. Viewer has been built using Google and is limited with what it can do with queries and other functions. Viewer is going to replace GeoCortex applications Facility Profiler (external), and Location Improvement Tool (internal). Doing a GAP analysis to find functional differences between existing apps and replacement YDO Viewer. Result will be sent to vendor for a change order/update request. Additional GeoCortex work and cleaning up Web Services.

OEM – Currently migrating from being part of OMD to a cabinet level agency. Been engaged with ESRI to use EAP credits for a data upload utility for evacuations. Evaluation of crisis management software application, OPCenter, to see if replacement update needed.

OSFM – Beginning transition to become separate agency from OSP in 2023. Working on Enterprise deployment and security configurations with ESRI. Will begin testing against use cases soon.

OWRD – State Hydro Framework will be participating in a PNW Hydro Framework call on Oct 21st. PNW Hydro meeting will focus on Lidar derived stream channels and update work being done at BLM, USFS, USGS. Got Enterprise install up at Data Center, trying to finesse security issues and administrator credentials.

OPRD – No Report

DHS – No report

ODA – No Report

DSL – Continuing migration to Enterprise and dealing with licensing. Difficulty in getting all taxlot data, specifically dealing with counties that charge a fee.

DLCD – Working internally to replace and revise Rachel’s position. Paperwork to be sent to DAS in a few weeks. Then a recruitment to fill position.

ODOT – Next month will kick off GIS advisory group, to be a nexus between day to day activities and larger tech and data governance community. Will help to make progress on 5yr business plan. TransGIS v4 is out now <https://gis.odot.state.or.us/transgis/>. Oregon Scenic Byways Storymap has been published. <https://oregonbywaystorymap.org/>

INR – No Report

OWEB – No Report

ESRI – No Report
